

About Bee Heroic

Bee Heroic is an unconventional info-to-action project that focuses on problems and solutions related to colony collapse in bee populations, geoengineering and climate issues, and the promotion of sustainable business and lifestyles.

At Bee Heroic, we feel these three topics are some of the most important environmental issues we are facing on Earth today.

Bee Heroic does outreach through customized education programs and tours, consultation, and a series of events - called Buzz Events - that incorporate serious information, sustainable business, activism, and fun, all in each bee-huggin' event.

Topics we cover:

Colony Collapse/Failure to Thrive: Issues involved in the decimation of bees and other pollinators include everything from GMO/agrochemical/systemic toxins, to mite infestation, to loss of habitat, decreased forage, aluminum poisoning via geoengineering, radiation and more.

Geoengineering/Weather Modification Practices: Issues involved in modification of our weather include chemical dispersion, RF/HAARP/CERN/DARPA/etc practices, seasonal disruption and weather anomalies, ozone depletion and radiation.

Sustainable Business and Lifestyles: Issues related to triple-bottom-line lifestyles and business practices.

Bee Heroic is fiscally sponsored and has attained non-profit status via the Pollinator Stewardship Council.

The bee is perhaps the most important insect in preservation of recent societies.

To know the bee
is to love the bee.

Bee Aware

Earth is currently experiencing the Sixth Great Mass Extinction. It is the only extinction that is caused by a single species; humans. At Bee Heroic, we help provide information and resources for humans interested in keeping our wonderful planet safe and healthy for future generations

Bee Heroic is currently seeking:

Partners: Seeking partners for events, advertising, outreach and more

Sponsors: Our *Capital Bee* page has information on how you can contribute via a one time gift, or small monthly "pollinator" donations of \$25-\$50/month

Vendors: Sustainable/Organic/Local (SOL) focused businesses for event participation

Presenters: If you are in a bee/eco-friendly industry, we want you to tell us about it

Volunteers: Bee-huggin' hive members are always appreciated

Got Questions?

If you are interested in participating, or have any questions, please feel free to contact:

Bee Heroic's Focus Topics

Bees and Pollinators

We are losing our pollinators at an extraordinary rate. Bees are especially important to humans as they pollinate 1/3 of our food sources. In addition to loss of these foods, their extinction will mean loss of entire economies, and devastating health and plant impacts.

Weather Modification/Geoengineering

While many people are aware of changes in the weather, cloud seeding and NASA's "man-made clouds", many are unaware of other climate geoengineering projects. From impacting pollinators' health, to soil and water contamination, to ozone depletion, the practice of these programs affects everyone.

Sustainable Lifestyles/CC

Sustainability is more than the 3 R's, it is a manner of living and doing business where we are both a conscious consumer and a voter. Understanding impacts we have on the environment, economies, personal health and wellness via the products we consume and our habits, makes our dollars more valuable.
